

PANERA THE MACHINE !!

'Panera' the machine, is conceived from the maharashtrian word Panera. He is a person who gives water wherever required and that too as per the required quantity. The same concept is the logic of the Machine... the only difference is - it doesn't go away for a tea-break, hence gives you the consistency in quality and peace of mind !

Concrete is the core of the construction industry! And the strength of concrete depends on water & cement ratio. The cement bag is 50 Kg. standard. Today aggregate and sand is added after weighing (weigh-batcher is compulsory everywhere.) The only unmeasured item you add today is water. So here after, add exact quantity of water and get the best quality consistent concrete from your conventional mixer only.

Panera perfectly fits on a standard 200 litre water barrel. So depending on the type of the mix, simply set the required volume of water. Panera will deliver exact quantity of water to your mixer, using VATs advanced flow meter technique. So you get the best consistent quality concrete.

Much R & D has been done to give you a state of the art functionality in the machine. The construction of the machine is in sturdy steel frame. Electrical accessories are protected by the unique design and electronic instrumentation is in IP-65 protection grade to protect from dust and water. Reset switch is extremely handy, yet sturdy enough to withstand harsh treatment at the construction site.

Now, don't depend on the 'beedi peene wala Anna', don't buy expensive ready mix plant. Get the perfect concrete from conventional mixer only.

Get absolute peace of mind, get Panera !
The Best Technology at Affordable Price only by.....

VatturkarIndustrial

A PORTABLE LIQUID DISPENSER - PANERA

The portable liquid dispenser comes with well thought features like user friendly, easy to install and carry, online calibration at site & remote operation by reset switch which gives you consistent quality and peace of mind .

Applications

Water dispenser for concrete mixer

Kettle filling at chemical industries and plants

Barrel filling at oil industry and refineries.

Beverage / Distillery industry

Bottling industry.

The VATS Flow Monitor

- ENCLOSURE : PORTABLE STEEL FRAME
- ELECTRICALS : 230 V AC (50Hz) +10%
- PUMP : 0.5 HORSEPOWER SELF PUMPING
- FLOW RATE : 2000 LITER / HOUR
- BATCHING : 0.1 TO 999999 LITERS
- SENSOR : WORLD FAMOUS VATS SENSOR
- FILTER : SPECIALLY DESIGNED (S.S.) MESH
- RESET : REMOTE OPERATION BY RESET SWITCH
- SIZE : SUITABLE TO KEEP ON TOP OF 200 LITER BARREL

**PUMP AND WETTED PARTS CAN BE CUSTOMISED AS PER SPECIFIC REQUIREMENT
WE ALSO MANUFACTURE FLOW / VELOCITY / CONDUCTIVITY / TDS METERS**
